Attorney Docket 71824

This is a detailed exploded view diagram of a mechanical assembly, likely a vehicle chassis or engine component. The diagram shows the following parts:

- Main Housing:** A large, complex metal frame on the left with multiple mounting points and internal structures.
- Wheels and Axles:** Four wheels with spokes are shown, each mounted on an axle assembly. The axles are connected to a central drive mechanism.
- Internal Mechanism:** A central assembly featuring a gear train, a central shaft, and various linkages and bearings.
- Mounting Brackets:** Several L-shaped or T-shaped brackets are shown, which serve to mount the wheels and the internal mechanism to the main housing.
- Fasteners:** Numerous bolts, nuts, and washers are indicated at various points where the components are joined.

The diagram is a technical line drawing, typical of engineering manuals, showing the spatial relationship and assembly sequence of the parts.
